Rubrics for grading the supporting documents, documenting the execution/monitoring, user guide, updates to project management documents. (Total weight 20%).

Category	Category	Criteria (10)	8-9 Points	6–7 Points	3-5 Points	0-2 Points
Supporting Documents 25%	**Clarity (5)**	Exceptionally clear, professional, and well-organized	Mostly clear with minor ambiguities	Understandable, noticeable issues	Difficult to follow, poor organization	Very unclear and disorganized
	Completeness (10)	All elements provided in depth (10)	Most elements included, minor omissions (8–9)	Missing several key elements (6–7)	Few elements included (3–5)	Minimal or no effort (0–2)
	Relevance (5)	Completely aligned and relevant	Mostly relevant, minor deviations	Partially relevant	Barely relevant or general	Irrelevant or unrelated
	Formatting (5)	Professionally formatted, error-free	Minor formatting or grammatical issues	Noticeable errors, lacks professionalism	Poorly formatted, significant errors	Unformatted or unacceptable
Development Process 25%	**Version Control (5)**	Comprehensive and systematic	Mostly systematic, minor gaps	Some tracking but inconsistent	Minimal or ad hoc	None
	Progress Logs (10)	Regularly updated, thorough, milestone-aligned (10)	Mostly clear, minor gaps (8–9)	Partial logs, noticeable gaps (6–7)	Sparse logs (3–5)	None (0–2)
	Issue Tracking (5)	All issues resolved, well-documented	Most issues resolved, minor omissions	Some issues tracked, unclear resolution	Minimal tracking	None
	Collaboration (5)	Thorough documentation of contributions	Mostly thorough, minor omissions	Basic documentation with gaps	Minimal or unclear documentation	None
User Guide 25%	**Clarity (10)**	Exceptionally clear, user-friendly (10)	Mostly clear, minor ambiguities (8–9)	Partially clear, requires effort to follow (6–7)	Hard to follow (3–5)	Unclear or missing (0–2)
	Feature Coverage (10)	Comprehensive with examples and details (10)	Most features, minor omissions (8–9)	Partial coverage, noticeable gaps (6–7)	Few features covered, poorly explained (3–5)	Minimal or no coverage (0–2)
	Formatting (5)	Excellent visuals, formatting, layout	Good visuals, minor inconsistencies	Basic visuals, inconsistent formatting	Poorly formatted, no visuals	Unformatted or missing
Project Updates 25%	**Timeliness (5)**	Always timely	Mostly timely, minor delays	Occasionally delayed	Often delayed	No updates provided
	Consistency (10)	Fully aligned with project progress (10)	Mostly aligned, minor inconsistencies (8–9)	Partial alignment, noticeable gaps (6–7)	Minimal alignment (3–5)	No alignment or unrelated updates (0–2)
	Detail (10)	Highly detailed, well-justified (10)	Mostly detailed, minor gaps (8–9)	Partial detail, minimal justification (6–7)	Sparse or unclear updates (3–5)	None or unjustified changes (0–2)

Rubric for grading the product (Software)-(Total weight: 20%)

Category	Category	Criteria (10)	8-9 Points	6–7 Points	3-5 Points	0-2 Points
Code Functionality 40%	**Feature 1 (10)**	Fully functional, meets all requirements	Mostly functional, minor issues	Partially functional, noticeable issues	Limited functionality, significant issues	Non-functional or missing
	Feature 2 (10)	Fully functional, meets all requirements	Mostly functional, minor issues	Partially functional, noticeable issues	Limited functionality, significant issues	Non-functional or missing
	Feature 3 (10)	Fully functional, meets all requirements	Mostly functional, minor issues	Partially functional, noticeable issues	Limited functionality, significant issues	Non-functional or missing
	Feature 4 (10)	Fully functional, meets all requirements	Mostly functional, minor issues	Partially functional, noticeable issues	Limited functionality, significant issues	Non-functional or missing
Code Quality 20%	**Consistency and Naming (5)**	Exceptionally consistent and clear	Mostly consistent with minor gaps	Partially consistent, noticeable issues	Poorly consistent	Inconsistent or disorganized
	Modularity and Reusability (5)	Highly modular, easy to reuse	Mostly modular, minor limitations	Moderately modular, limited reusability	Poorly modular, hard to reuse	Non-modular
	Inline Comments (5)	Detailed, informative comments	Mostly clear comments, minor gaps	Some comments but lacks clarity	Sparse comments, unclear explanations	No comments
	Avoid Redundancy (5)	Code is concise and easy to read	Mostly concise, minor redundancies	Noticeable redundancy or hard-to-read	Significant redundancy, poorly written	Unreadable or highly redundant
Error Handling 15%	Appropriate error messages	All scenarios handled with clear messages	Most scenarios handled, minor gaps	Some scenarios handled, lacks clarity	Few scenarios handled or unclear	No error handling
Testing 15%	Unit tests for all components	Comprehensive and effective testing	Mostly tested, minor gaps	Some tests included, lacks depth	Few tests included or poorly designed	No tests
UI Design 10%	Intuitive and user-friendly	Fully intuitive, highly user-friendly	Mostly intuitive, minor usability issues	Moderately user-friendly, lacks clarity	Poor usability or hard to navigate	Unintuitive or unusable

Rubric for grading integration with other sub-projects (Total weight: 10%)

Category	Criteria (10)	8-9 Points	5–8 Points	0–4 Points
Communication and Collaboration (15%)	Effective and regular communication with other teams	Actively engaged with teams, clear meeting notes, and regular updates	Some communication, but lacks consistency or clarity in meeting notes	Minimal communication or lacks evidence of collaboration
Capacity for Integration (20%)	Sub-project designed for easy integration with other components	Modular design, clear interfaces, adheres to agreed standards	Some modularity, clear interfaces with minor deviations from standards	Lacks modularity, unclear or poorly defined interfaces
Documentation Support (10%)	Adequate documentation for integration efforts	Clear, detailed documentation (API guides, manuals, etc.)	Documentation with some gaps or unclear instructions	Incomplete or unclear documentation; missing essential details
Functional Integration (5%)	Successful integration of sub-project with at least one other team	Sub-project integrates seamlessly with another team's component	Integration with minor issues, but functionality is mostly intact	Integration fails or does not demonstrate cohesive functionality

\

Presentation Rubric (Total weight 10%)

Category	Criteria	9-10 Points	6–8 Points	4-5 Points	2-3 Points	0–1 Points
Content Delivery (20%)	Clarity and Engagement	Clear, engaging, and confident delivery	Mostly clear, engaging with minor lapses	Somewhat clear, engaging with noticeable gaps	Unclear, disengaging, hard to follow	Unclear and disengaging
Visual Quality (25%)	Professional and Supportive Visuals	Highly professional, enhances message	Mostly professional, minor inconsistencies	Adequate visuals, some inconsistencies	Poor quality visuals, distracting	No visuals or inappropriate visuals
Software Demo (30%)	Demonstration and Execution	Flawless execution, showcases all features	Mostly flawless, minor hiccups	Some features missing or poorly executed	Significant missing or incorrect features	No demonstration or poorly executed
Time Management (25%)	Pacing and Coordination	Perfectly timed, well-coordinated	Mostly on time, slight miscoordination	Frequently off time, noticeable issues	Frequently off time, poorly coordinated	No time management or severely uncoordinated
