CPS714- Software Project Management
Project Assignment#2
Deadline: Nov. 24nd, 2025, 9:00 AM

Assignment Focus: Executing, Monitoring, and Closing

In Assignment 1, you developed initial plans for integration, scope, and schedule management. According to the project timeline outlined in the initial project description (provided below for reference), project development should have commenced in Week 6. This assignment emphasizes the **executing, monitoring, and closing** phases of the project.

Your team will continue development and testing of your assigned sub-projects, with a focus on integration with other teams within your section. Throughout this phase, you should monitor progress and adjust plans as needed to reflect actual scope, schedule, and cost incurred during execution.

For the final submission, your team will provide a revised version of your plans from Assignment 1, showcasing adjustments made during execution. Submit all project artifacts, including design and modeling diagrams, test cases, and a user guide.

Finally, your team will present your work in the week of Nov. 25–Nov. 29 as part of your section's one-hour lab session, covering key learnings from the executing, monitoring, and closing stages.

Timeline and Sub-Project Phases (Original Plan):

- **Week 2-3**: Project planning, team formation, and role assignment across sub-projects.
- **Week 4-5**: Requirements gathering and detailed planning for each sub-project.
- **Week 6-9**: Prototype development for each sub-project.
- **Week 8-11**: Integration testing and revisions.
- **Week 12**: Final presentation and submission of deliverables.

Evaluation:

- **Project Planning & Management**: 40% (Assignment#1: **Complete**)
- **Sub-project Functionality**: 30% (evaluated individually for each sub-project)
- **Integration and User Experience**: 10%
- **Documentation and Presentation**: 20%

Each team will be responsible for delivering their assigned sub-project, working together to ensure full integration and a cohesive final product. This project emphasizes project management skills while maintaining a focus on effective team collaboration and communication.
